

FDOTConnect Virtual Training Labs

Automated Quantities

July 20, 2023

8 PDH's

Instructors

Denise Broom, Digital Practice Specialist | Stantec

Gary Gaiotti, PE, Chief Roadway Designer | Bayer United

Krissy Hoffman, PE, Senior Transportation Engineer | Arcadis U.S., Inc.

Description

This training course details the Florida Department of Transportation (FDOT) Quantity Workflow developed for the Summary of Quantity Reports required for the Estimated Quantities Report PDF. The participants will learn the use of FDOT and OpenRoads Designer tools required in the workflow. This includes tools used to assign pay item information to 2D and 3D design elements, calculate quantities, and export quantity reports. This course also covers the Designer Interface Quantity Builder, used to generate an XML file compatible for upload to Designer Interface for AASHTOWare Project Preconstruction.

Objectives

- Item Types
- Asset Manager
- Pay Items and Quantities
- Quantity Takeoff Manager
- Generating Summary Reports
- Summary Reports Builder
- Estimated Quantities Report
- Exporting Data to Designer Interface
