

Nutrient Calculations

May 30, 2024

1 PDH

Presenters

John Coates, PE - Director of the Division of Water Resource Management | FDEP

Borja Crane-Amores - Program Management Manager, Division of Water Resource Management | FDEP

Aaron Ray - Environmental Administrator, Stormwater and Technical Services Program | Division of Water Resources Management, FDEP

Emma Baird, PE – State Stormwater Engineer | Division of Water Resources Management, FDEP

Summary:

Nutrient Calculations: This presentation will review the equations and options outlined in Applicant Handbook Volume I for calculate the nutrient loading for a site. The examples will also review the process for determining the applicable treatment standards as well as some options for systems that would achieve those stormwater performance standards.
